1. Pre generated codes

100

distribute and shop lady will request for more if needed

Customer comes in

SL gives activated voucher

SL gets customer to write contact details on the card

problem: expiry date only appears when card is activated

1. customer goes online and activates voucher

2. the person that gives it out, activates it

3. shop lady activates on POS through barcode scanning
not trustworthy

4. each week - whoever gives out voucher emails cynthia and Cynthia activates it.
email with customer details - name, number, year

painful

expiry date appears as soon as code is generated

report to school - as per old - has cover page

comparison report - year to year /month to month (vertical)
- scrap the horizontal one (wont work as per Sam's thought)

delivery report - filter by school, year to year/month to month

1. report - think about the metrics
 - what is important to the business
 = in regards to this section, accurate and timely reports are our major form of monitoring business performance and future growth.

- question to ask:

1. how do we know if our business is performing well?
2. how do we improve?
3. how do we catch leaks? - unnoticed loss

= these computer systems arent used for us to keep track of business performance, we use other accounting softwares to monitor this more closely together with monthly director meetings.

2. POS student assistance procedure
 3. finalise code generator + everything else
